CMMB is proud that, thanks to your generosity, 98% of the support we receive goes directly to serving others.

VOLUNTEER PROFILE

Emily Finn

Occupational Therapist
Ecuador
Duration: 1 year

Emily volunteered at a pediatric clinic, PediHabilidad, in Tena, Ecuador. During her time there she helped prepare for a neurological brigade that served approximately 300 patients from all over Tena. Emily also coordinated the inauguration event of a barrier-free kids park named Sin Barreras Parque Infantil Manos Unidas. The opening of this park took half a year to prepare, from getting local authorities to provide financial support, and getting equipment like adapted swings donated from the United States. Additionally, she sorted equipment donations, and did home visits to refurbish equipment including wheelchairs, seats, and standing frames.

Read a story about how Emily fixed up a wheelchair for a very special patient, Marlon.

HEALING HELP

Healing Help had yet another record-breaking year, with the value of products received totaling \$495,929,237. This resulted in a record 379 containers shipped to 166 clinics and hospitals in 35 countries. This success story attests to the strong relationships we have established with product donors.

Our Healing Help program is known for its ability to efficiently and quickly deliver product to those in need. This was never more apparent than when Typhoon Haiyan (Yolanda) struck the Philippines. Within days, CMMB had garnered medicine and medical supplies valued at more than \$10 million, which was shipped quickly to medical facilities in dire need of essential medicines. CMMB has a decades-long record of sending aid to a number of organizations in the Philippines and the record stood us in good stead at a time of disaster. For its efforts, CMMB has been recognized by the Philippines Consul General and both Nassau and Suffolk County Executives for the emergency aid provided when in response to Typhoon Haiyan and also when Typhoon Sendong (Washi) struck the Philippines in 2011.

OUR MISSION

Rooted in the healing ministry of Jesus, Catholic Medical Mission Board works collaboratively to provide quality healthcare programs and services, without discrimination, to people in need around the world.

Catholic Medical Mission Board is a non-profit, religious, 501 (c) (3) organization that provides services and delivers aid without regard to creed, race, sex, or national or political circumstance. Catholic Medical Mission Board is a non-governmental organization in consultative status with the Economic and Social Council (ECOSOC) of the United Nations.

CMMB.ORG

SHARE IN OUR SUCCESS

This was a milestone year for CMMB, with success marking every turn in the road. With revenues doubling, along with the volume of donated medicines and medical supplies received and placed, we were able to also double the number of those we served. The information presented here shares that success. This accomplishment was, in no small part, thanks to your ongoing support of our mission and vision. **Thank you.**

In addition to our continuing work, which reached 902,000 children, women and men, we began the year by introducing and taking the first steps to implement Strategy 2014-2020. As CMMB enters its second century, we will enhance and expand our service to others, focusing on improving the lives of children and mothers.

CHAMPS (CHildren And Mothers Partnerships) is at the center of this focus. It is our primary model for improving health and building strong communities.

As always, our success depends on your continued support. The mission and vision of CMMB that you have so strongly embraced is always in the forefront of our work. Thank you, once again, for being with us as we serve each and every person through our programs. We look forward to your continued partnership with us.

Thank you.

Bruce Wilkinson
President & Chief Executive Officer

PREVENTION & TREATMENT PROGRAMS

CMMB implements programs to prevent and treat major health concerns with an emphasis on improving the health of women and children by increasing access to health services, training health workers and building local health capacities. Here are some highlights of our programmatic work over the last year:

902,202 people received health services

157,246

children received critical health services

1,872 health workers trained

60,053

pregnant women assisted

STRATEGY

MOVING INTO OUR SECOND CENTURY: Saving and Improving the Lives of Children and Mothers

Through long-term partnerships with communities in Africa, Latin America and the Caribbean, we are working to improve the lives of mothers and their children by eradicating those illnesses that contribute to maternal and child mortality:

Saving Children
Fewer deaths

Saving Mothers
Fewer deaths from pregnancy & childbirth

Saving Women
Decrease in deaths from key chronic diseases

Increasing Nutrition
Reduction in underweight children & women's diseases

Increasing Safe Water & Sanitation
More access to clean water & sanitation

Increasing Access to Medicine
Greater reach with effective medicines

Our new strategy focuses on addressing the leading causes of death for women and children to deliver impact-driven, sustainable health services. It is based on the **CHAMPS (CHildren And Mothers Partnerships)** model. Each **CHAMPS** will feature community-led, multi-year efforts to address the leading causes of maternal and child death, such as diarrhea, pneumonia, and malaria. It will link and strengthen both the community-based and health facility-based health services. In addition, **CHAMPS** will address additional influencers of good health, including water and sanitation, agriculture/nutrition and economic development.

HAITI

A member of the **Haiti Amputee Coalition**, CMMB reduces the impact of mobility disabilities through comprehensive prosthetic and orthotic services, rehabilitation and psychosocial support. The Coalition was created immediately following the earthquake in 2010 to provide urgent medical care and high-quality prostheses for amputees, to

ensure a high quality of life and give hope for their futures. The program provides far more than medical services alone – it provides food and shelter, physical therapy, ongoing prosthetic adjustment services, income generation support and psycho-social services to amputees. In the last year:

- 316 Haitians received prosthetics or orthotics
- Over 488 follow-up visits conducted

KENYA

CMMB Kenya possesses a strong track record of strengthening health systems and providing quality programming in concert with its local partners and implementing facilities. Following its pioneering HIV/AIDS work in Kenya, CMMB joined with a number of partners to implement CHAP (CHAK HIV/AIDS Program).

With the acknowledgement that the performance of any health service delivery system depends largely on the capacity of its various systems, the CHAP grant is actively working on strengthening these systems with the support of CMMB. The aim is to ensure stronger systems in the facilities. We provide direct assistance in the areas of human resources, leadership, and governance, as well as

financial management systems including compliance to USG rules and regulations.

The CHAP program encompasses 38,000 active patients in 20 faith based-health facilities in Eastern, Central, Coast and Nairobi regions of Kenya, with 87% of those receiving anti-retroviral treatment. The program boosts of an 82.5% retention rate. The national average is close to 60%.

PERU

CMMB's Rehabilitacion con Esperanza (Rehabilitation with Hope) program provides much-needed physical, social, and psychological care for the mentally disabled children of the Nuevo Jerusalén village in the district of La Esperanza in Trujillo, Peru. Part of the work in Rehabilitacion con Esperanza includes educating the families and the local community in order to form a more supportive environment for the children, many of whom are not accepted at their local school. In the last year, CMMB has improved the lives of 35 children and has given them even more hope for a brighter future:

- 931 home-based therapy sessions completed
- 12 physical therapy workshops conducted for community health works
- 117 physical therapists trained

SOUTH SUDAN

With nearly three mothers dying per 100 births in Ezo County of South Sudan, there is great need to ensure mothers deliver at health facilities with well-trained, well-equipped personnel. CMMB's Safe Motherhood Project works to train and support traditional birth

attendants, nurses and midwives in safe delivery and infant health, as well as provide direct surgical and ambulance support services. A delivery wing was constructed in the Ezo Primary Health Care Center and is providing a low-cost Safe Delivery Suite for mothers in labor. In addition, all newborns are provided with essential vaccines, such as the polio vaccine, before discharge. In the last year, this has resulted in:

- 138 safe deliveries
- 36 traditional birth attendants trained

ZAMBIA

The Zambia-Led Prevention Initiative (ZPI), is a four-year project where CMMB serves as the technical lead for HIV prevention services, providing technical assistance on community-based Prevention of Mother-to-Child Transmission (PMTCT), HIV Testing and Counseling (HTC), Voluntary Medical Male Circumcision (VMMC) and Prevention with Positives (PwP) services. CMMB also works to implement HIV/AIDS prevention programs in Zambia through the Men Taking Action and Community Compacts programs. CMMB, through ZPI, has:

- Reached over 7,500 People Living with HIV/AIDS (PLHIV) with a minimum package of Prevention with PLHIV (PwP) interventions.

- 56,987 individuals received Testing and Counseling services for HIV and received their test results.
- 693 community health workers completed training programs through this project.
