HEALING HELP

Healing Help had yet another record-breaking year, with the value of products received totaling $495,929,237. This resulted in a record 379 containers shipped to 166 clinics and hospitals in 30 countries. This success story attests to the strong relationships we have established with product donors.

Our Healing Help program is known for its ability to efficiently and quickly deliver product to those in need. This was never more apparent than when Typhoon Haiyan (Yolanda) struck the Philippines. Within days, CMMB had garnered medicine and medical supplies valued at more than $10 million, which was shipped quickly to medical facilities in dire need of essential medicines. CMMB has a decades-long record of sending aid to a number of organizations in the Philippines and the record stood us in good stead at a time of disaster. For its efforts, CMMB has been recognized by the Philippines Consul General and both Nassau and Suffolk County Executives for the emergency aid provided when in response to Typhoon Haiyan and also when Typhoon Seizing (Wash) struck the Philippines in 2011.

VOLUNTEER PROFILE

Emily Finn

Occupational Therapist

Duration: 1 year

Emily volunteered at a pediatric clinic, Padrihability, in Tena, Ecuador. During her time there she helped prepare for a neurological brigade that served approximately 300 patients from all over Tena. Emily also coordinated the inauguration event of a barrier-free kids park named Sir Barrienes Pique Infantil Manni Unidas. The opening of this park took half a year to prepare, from getting local authorities to provide financial support, and getting equipment like adapted swings donated from the United States. Additionally, she sorted equipment donations, and did home visits to refurbish equipment including wheelchairs, seats, and standing frames.

Read a story about how Emily fixed up a wheelchair for a very special patient, Marlon.

SHARE IN OUR SUCCESS

Bruce Wilkinson
President & Chief Executive Officer

This was a milestone year for CMMB, with success marking every turn in the road. With revenues doubling, along with the volumes of donated medicines and medical supplies received and processed, we were able to also double the number of the services we served. The information presented here shares success. This accomplishment was, in no small part, thanks to your ongoing support of our mission and vision. Thank you.

In addition to our continuing work which reached 902,000 children, women and men, we began the year by introducing and taking the first steps to implement Strategy 2014-2020. As CMMB enters its second century, we will enhance and expand our service to others, focusing on improving the lives of children and mothers.

CMMB’s (Children and Mothers Partnership) is at the center of this focus. It is our primary model for improving health and building strong communities.

As always, our success depends on your continued support. The vision and mission of CMMB that you have so strongly embraced is always in the forefront of our work. Thank you, once again, for being with us as we serve each and every person through our programs. We look forward to your continued partnership with us.

Thank you.

HAITI
A member of the Haiti Amputee Coalition, CMMB reduces the impact of mobility disabilities through comprehensive prosthetic and orthotic services, rehabilitation and psychosocial support. The Coalition was created immediately following the earthquake in 2010 to provide urgent medical care and high-quality prostheses for amputees, to ensure a high quality of life and give hope for their future.

The program provides far more than medical services alone – it provides food and shelter, physical therapy, ongoing prosthetic adjustment services, income generation support and psycho-social services to amputees. In the last year: 316 Haitians received prosthetics or orthotics

• Over 480 follow-up visits conducted

KENYA
CMMB Kenya possesses a strong track record of strengthening health systems and providing quality programming in concert with its local partners and implementing facilities. Following its pioneering HIV/AIDS work in Kenya, CMMB joined with a number of partners to implement CHAP (CHAK HIV/AIDS Program).

With the acknowledgement that the performance of any health service delivery system depends largely on the capacity of its various systems, the CHAP grant is actively working on strengthening these systems with the support of CMMB. The aim is to ensure stronger systems in the facilities. We provide direct assistance in the areas of human resources, leadership, and governance, as well as financial management systems including compliance to USG rules and regulations.

The CHAP program encompasses 38,000 active patients in 20 faith-based health facilities in Eastern, Central, Coast and Nairobi regions of Kenya, with 87% of those receiving antiretroviral treatment. The program boasts of an 82.5% retention rate. The national average is close to 60%.

PERU
CMMB’s Rehabilitation con Esperanza (Rehabilitation with Hope) program provides much-needed physical, social, and psychological care for the mentally disabled children of the Nuevo Jerusalem village in the district of La Esperanza in Trujillo, Peru. Part of the work in Rehabilitation con Esperanza includes educating the families and the local community in order to form a more supportive environment for the children, many of whom have not been accepted at their local school.

In the last year, CMMB has improved the lives of 35 children and has given them even more hope for a brighter future:

• 391 home-based therapy sessions completed
• 12 physical therapy workshops conducted for community health workers
• 117 physical therapists trained

SOUTH SUDAN
With nearly three mothers dying per 100 births in Ezo County of South Sudan, there is great need to ensure mothers deliver in the facilities with well-trained, well-equipped personnel. CMMB’s Safe Motherhood Project works to train and support traditional birth attendants, nurses and midwives in safe delivery and infant health, as well as provide direct surgical and ambulance support services. A delivery wing was constructed in the Ezo Primary Health Center and is providing a low-cost Safe Delivery Suite for mothers in labor. In addition, all newborns are provided with essential vaccines, such as the polio vaccine, before discharge. In the last year, this has resulted in:

• 138 safe deliveries
• 36 traditional birth attendants trained

ZAMBIA
The Zambia-Led Prevention Initiative (ZPI), is a four-year project where CMMB serves as the technical lead for HIV prevention services, providing technical assistance on community-based Prevention of Mother-to-Child Transmission (PMTCT), HIV Testing and Counseling (HTCT), Voluntary Medical Male Circumcision (VMMC) and Respectful Pain Palliative (RPP) services.

CMMB also works to implement HIV/AIDS prevention programs in Zambia through the Men Taking Action and Community Initiatives (ZPI), is a four-year project where CMMB serves as the technical lead for HIV prevention services, providing technical assistance on community-based Prevention of Mother-to-Child Transmission (PMTCT), HIV Testing and Counseling (HTCT), Voluntary Medical Male Circumcision (VMMC) and Respectful Pain Palliative (RPP) services.

In addition, CMMB will address additional influencers of good health, including water and sanitation, agriculture/nutrition and economic development.

STRAtegy
MOVING INTO OUR SECOND CENTURY: Saving and Improving the Lives of Children and Mothers

Through long-term partnership with communities in Africa, Latin America and the Caribbean, we are working to improve the lives of mothers and their children by eliminating those barriers that contribute to maternal and child mortality.

Our new strategy focuses on addressing the leading causes of death for women and children to deliver impact-driven, sustainable health services. It is based on the Children and Mothers Partnership (CHAMPs) model. Each CHAMPs will feature an estimated two to three year efforts to address the leading causes of maternal and child deaths, such as diarrhea, pneumonia, and malaria. It will first work to strengthen both the community-based health facility and the health services, in addition, CHAMPs will address additional influencers of good health, including nutrition and sanitation, agriculture/nutrition and economic development.

To learn more about CMMB’s work, please visit our website at www.cmmb.org.
