

Technical Advisor, Data Management & Learning

Location: Zambia

Contingent upon funding

We believe in a world in which every human life is valued, and health and human dignity are shared by all.

We believe that access to quality healthcare is a basic human right. For more than 100 years, we have worked with global partners to deliver locally sustainable, quality healthcare solutions to women, children and their communities. We're ready to make it 100 more.

We believe change starts with her.

We work tirelessly for women's and children's health because they are disproportionately affected by illness and poverty. We know that healthy, educated, and empowered women are better able to raise healthy, educated, and confident children, and that communities depend on their livelihoods. We're making an impact – [learn more](#).

We believe in people.

We strive to live out our core values of **collaboration**, **love**, **excellence** and **respect** every day. We provide our employees with a competitive salary and a meaningful benefits package, with opportunities to learn and grow. We especially encourage all persons of diverse backgrounds to apply.

Overview

The Technical Adviser Data Management and Learning (DML TA) will report to the CoP and be responsible for leading the design and implementation of the activity monitoring and evaluation framework and information system to track delivery against targets, outcomes and impacts. S/he will lead analysis of data collected for assessment of progress and areas of improvement. S/he will guide reporting processes amongst technical staff and consolidates program reports, promote learning and knowledge sharing of best practices and lessons learnt. S/he will support all the technical staff in M&E functions and will manage any M&E related staff in the program. S/he will ensure maximum utilization of Zambia's SmartCare system for patient tracking and follow-up so as support positive treatment outcomes (inc. retention) and to build an evidence-base for program results. H/She will interact with numerous GRZ institutions and representatives, particularly at the county/facility level on data management and utilization. S/he will lead team in program implementation and any other duties as assigned.

Minimum Requirements

- A Master's degree in a relevant discipline, such as public health, mathematics, business, statistics, or international relations.
- At least seven years of experience designing and implementing monitoring and evaluating activities for complex programs in developing countries.
- Experience supporting electronic patient data systems and records
- Ability to follow established procedures and high level of integrity in dealing with sensitive information.
- A firm command of the M&E issues with respect to improvements in quality integrated service and support programs.
- Demonstrated experience in setting up and managing M&E systems that track performance as per the objectives of this project (e.g. service integration, performance against each funding stream).
- Demonstrated analytical skills to measure the outcomes of the project's activities and support project supervision.
- Strong writing and organizational skills for monitoring and reporting on program and program outcomes and impacts.
- Professional level of oral and written fluency in English language.
