

CMMB makes long-term commitments in the communities where we work to create a lasting impact by educating and training community members so the care is sustainable. Our three main programs include Children and Mothers Partnerships, Medical Donations, and Volunteer.

Transforming the lives of women and children.

Poverty disproportionately affects women and children. Our Children and Mothers Partnerships program (CHAMPS) provides health and well-being to mothers, children, and their families and communities

Increasing access to quality medicines worldwide.

Clinic shelves are often bare in low-resource countries, and low incomes make medicine unobtainable. Our Medical Donations Program (MDP) has deployed more than \$4 billion worth of medical product in 88 countries over the last ten years.

Volunteering to strengthen health facilities.

Volunteers through our Volunteer Program have an opportunity to strengthen and support communities through healthcare programs and other initiatives while building a longstanding legacy.
